CONTENTS OF VOLUME 4

Number 1, January 1962

van Bruggen, E. F. J., Wiebenga, E. H. and Gruber, M., Structure and Properties of Hemocyanins. I. Electron Micrographs of Hemocyanin and Apohemocyanin from *Helix pomatia* at different pH Values . . . 1

van Bruggen, E. F. J., Wiebenga, E. H. and Gruber, M., Structure and Properties of Hemocyanins. II. Electron Micrographs of the Hemocyanins of *Sepia officinalis, Octopus vulgaris* and *Cancer pagurus* 8

Oosawa, F. and Kasai, M., A Theory of Linear and Helical Aggregations of Macromolecules 10

Rolfe, R., The Molecular Arrangement of the Conserved Subunits of DNA . 22

Stollar, D. and Grossman, L., The Reaction of Formaldehyde with Denatured DNA: Spectrophotometric, Immunologic, and Enzymic Studies . . 31

Bradbury, E. M., Price, W. C. and Wilkinson, G. R., Polarized Infrared Studies of Nucleoproteins. I. Nucleoprotamine 39

Bradbury, E. M., Price, W. C., Wilkinson, G. R. and Zubay, G., Polarized Infrared Studies of Nucleoproteins. II. Nucleohistone 50

Appendix: Optical Rotatory Dispersion Studies of Solid Films and Solutions of Histone, A. Elliott, E. M. Bradbury and G. Zubay 61

Number 2, February 1962

Crespi, H. L. and Katz, J. J., Thermal Denaturation of Ordinary and Fully Deuteriated DNA in H_2O and D_2O 65

Zubay, G., Wilkins, M. H. F. and Blout, E. R., An X-ray Diffraction Study of a Complex of DNA and a Synthetic Polypeptide 69

Tsugita, A. and Fraenkel-Conrat, H., The Composition of Proteins of Chemically Evoked Mutants of TMV RNA 73

Tomita, K., Rich, A., de Lozé, C. and Blout, E. R., The Effect of Deuteration on the Geometry of the α-Helix 83

Morowitz, H. J., Tourtellotte, M. E., Guild, W. R., Castro, E., Woese, C. and Cleverdon, R. C., The Chemical Composition and Submicroscopic Morphology of *Mycoplasma gallisepticum*, Avian PPLO 5969 . . . 93

Johns, H. E., Rapaport, S. A. and Delbrück, M., Photochemistry of Thymine Dimers 104

Letters to the Editor—

A New Form of Ribosome from Yeast, R. S. Morgan 115

A Molecular Probe for the Antibody Site, M. Winkler 118

Chain Growth of Proteins: Some Consequences for the Coding Problem, A. Goldstein 121

NUMBER 3, MARCH 1962

GREER, S. and ZAMENHOF, S., Studies on Depurination of DNA by Heat . 123

SINSHEIMER, R. L., STARMAN, B., NAGLER, C. and GUTHRIE, S., The Process of Infection with Bacteriophage ϕX174. I. Evidence for a "Replicative Form" 142

SUEOKA, N. and CHENG, TS'AI-YING, Fractionation of Nucleic Acids with the Methylated Albumin Column 161

MACLEAN, E. C. and HALL, C. E., Studies on Bacteriophage ϕX174 and its DNA by Electron Microscopy 173

FERMI, G. and STENT, G. S., Protein Synthesis and the Onset of Intracellular Bacteriophage Growth. III. Replication of the Genome of a Secondary Phage 179

KURLAND, C. G. and MAALØE, O., Regulation of Ribosomal and Transfer RNA Synthesis 193

Letters to the Editor—

Some Unusual Properties of the DNA Component of Yeast Lactic Dehydrogenase, A. DA S. PEREIRA and H. R. MAHLER . . . 211

Ionization of DNA Bases or Base Analogues as a Possible Explanation of Mutagenesis, with Special Reference to 5-Bromodeoxyuridine, P. D. LAWLEY and P. BROOKES 216

Effet des Analogues de la L-Thréonine et de la L-Isoleucine sur la L-Thréonine Désaminase, J.-P. CHANGEUX 220

NUMBER 4, APRIL 1962

KERRIDGE, D., HORNE, R. W. and GLAUERT, A. M., Structural Components of Flagella from *Salmonella typhimurium* 227

HARRISON, P. M. and HOFMANN, T., The Structure of Apoferritin: Evidence for Chemical Subunits from "Fingerprints" of Tryptic Digests . . . 239

HARRISON, P. M., HOFMANN, T. and MAINWARING, W. I. P., The Structure of Apoferritin: Amino Acid Composition and End-groups 251

FINCHAM, J. R. S., Genetically Determined Multiple Forms of Glutamic Dehydrogenase in *Neurospora crassa* 257

KAISER, A. D., The Production of Phage Chromosome Fragments and their Capacity for Genetic Transfer 275

CHAMPE, S. P. and BENZER, S., An Active Cistron Fragment . . . 288

LOWEY, S. and COHEN, C., Studies on the Structure of Myosin . . . 293

Letters to the Editor—

The Utility of Formaldehyde in Stabilizing Polynucleotide Chains from Bacteriophage DNA, C. A. THOMAS, JR. and K. I. BERNS . . 309

Specificity and Concentration Limit in Self-Protection against Mechanical Breakage of DNA, E. BURGI and A. D. HERSHEY 313

Studies on the Structure of Feather Keratin. III. Optical Rotatory Dispersion of Soluble Feather Keratin, C. J. WESTOVER, M. L. TIFFANY and S. KRIMM 316

Multiplicity Reactivation and Radiation Stability, N. SYMONDS . . 319

Index to Volume 4

Albumin column (see methylated albumin column), 161
α_2 subunits (see haemoglobin), 329
Amino acid composition of ribosomes from *Escherichia coli*, 395
— — of apoferritin, 251
Antibody site, a molecular probe, 118
Antonini, E., Wyman, J., Bucci, E., Fronticelli, C. & Rossi-Fanelli, A., The dissociation and recombination of subunits of human, horse and canine haemoglobin, 368
Apoferritin, evidence for chemical subunits from "fingerprints" of tryptic digests, 239
— amino acid composition and end-groups, 251
Apohaemocyanin (see haemocyanins), 1
Asano, K. (see Nomura, M.), 376
Autoradiography, a minimum estimate for the length of the DNA of *E. coli*, 407
Avian PPLO 5969 (see *Mycoplasma gallisepticum*), 93
Azathymine-containing bacteria, u.v.-resistance, 413

Bacteria containing azathymine, u.v. resistance, 413
— thymine dimerization and survival rate, 410
Bacterial DNAs, a relation between dinucleotide and base frequencies, 418
Bacteriophage chromosome fragments and their capacity for genetic transfer, 275
— DNA, the use of formaldehyde in stabilizing polynucleotide chains, 309
— genome replication, 179
— infected *E. coli*, RNA metabolism, 376
— ϕX174, evidence for a "replicative form", 142
— — DNA in the electron microscope, 173
Baldwin, R. L. (see Kaiser, A. D.), 418
Base composition of DNA from its buoyant density in CsCl, 430
Base frequencies in bacterial DNAs, 418
Beaven, G. H. (see Huehns, E. R.), 323, 329
Benzer, S. (see Champe, S. P.), 288
Berns, K. I. (see Thomas, C. A., Jr.), 309
Beychok, S., de Lozé, C. & Blout, E. R., Helix contents of solutions of native and acid-denatured ferrihaemoglobin and ferrimyoglobin, 421
Birefringence of quantosomes from spinach chloroplasts, 451
Blout, E. R. (see Zubay, G.), 69
— (see Beychok, S.), 421
— (see Tomita, K.), 83
Bradbury, E. M. (see Elliott, A.), 61
— Price, W. C. & Wilkinson, G. R., Polarized infrared studies of nucleoproteins. I. Nucleoprotamine, 39
— — — & Zubay, G., Polarized infrared studies of nucleoproteins. II. Nucleohistone, 50
5-Bromodeoxyuridine mutagenesis, ionization of DNA bases or base analogues, 216
Brookes, P. (see Lawley, P. D.), 216
van Bruggen, E. F. J., Wiebenga, E. H. & Gruber, M., Structure and properties of haemocyanins. I. Electron micrographs of haemocyanin and apohaemocyanin from *Helix pomatia* at different pH values, 1
— — — — II. Electron micrographs of the haemocyanins of *Sepia officinalis*, *Octopus vulgaris* and *Cancer pagurus*, 8
Bucci, E. (see Antonini, E.), 368
Burgi, E. & Hershey, A. D., Specificity and concentration limit in self-protection against mechanical breakage of DNA, 313

Caesium chloride determinations of the base composition of DNA from its buoyant density, 430
Cairns, J., A minimum estimate for the length of the DNA of *E. coli* obtained by autoradiography, 407
Calvin, M. (see Sauer, K.), 451
Cancer pagurus, electron micrographs of extracted haemocyanins, 8
Castro, E. (see Morowitz, H. J.), 93
Cationic forms of DNA, 415
Champe, S. P. & Benzer, S., An active cistron fragment, 288
Changeux, J.-P., Effet des analogues de la L-thréonine et de la L-isoleucine sur la L-thréonine désaminase, 220
Cheng, Ts'ai-Ying (see Sueoka, N.), 161
Chloromycetin effect on phage inhibition of host ribosomal and soluble RNA, 376
— particles, physical properties, 388
Chloroplasts from spinach, molecular orientation in quantasomes, 451
Chromosome fragments from phage and their capacity for genetic transfer, 275
Cistron, an active fragment, 288
Cleverdon, R. C. (see Morowitz, H. J.), 93
Coding problem, some consequences from the chain growth of proteins, 121
Cohen, C. (see Lowey, S.), 293
Crespi, H. L. & Katz, J. J., Thermal denaturation of ordinary and fully deuteriated DNA in H_2O and D_2O, 65

Dance, N. (see Huehns, E. R.), 329
Deaminase, L-threonine, effects with analogues of L-threonine and L-isoleucine, 220
Delbrück, M. (see Johns, H. E.), 104
Dellweg, H. (see Wacker, A.), 410
Dehydrogenase (see yeast lactic dehydrogenase), 211
Deoxyribonucleic acid, an X-ray diffraction study in combination with histone and protamine, 444
— an X-ray diffraction study of a complex with a synthetic polypeptide, 69
— bases, a theory of ionization as the basis of mutagenesis, 216
— determination of the base composition from its buoyant density in CsCl, 430
— factors controlling the reversibility of denaturation, 467
— from bacteria, a relation between dinucleotide and base frequencies, 418
— from bacteriophage ϕX174, electron microscope studies, 173
— from bacteriophage, the use of formaldehyde in stabilizing polynucleotide chains, 309
— from yeast lactic dehydrogenase, properties, 211
— molecular arrangement of conserved subunits, 22
— of *E. coli*, a minimum estimate for the length by autoradiography, 407
— photodynamic reaction with methylene blue, 488
— reaction with formaldehyde, 31
— specific volume of various cationic forms, 415
— specificity and concentration limit in self-protection against mechanical breakage, 313
— studies on depurination by heat, 123
— thermal denaturation in water and deuterium oxide, 65
Depurination of DNA by heat, 123
Deuterated DNA, thermal denaturation in water and deuterium oxide, 65
Deuteration effects on the geometry of the α-helix, 83
Dichroism of quantasomes from spinach chloroplasts, 451
Dinucleotide frequencies in bacterial DNAs, 418
Doty, P. (see Schildkraut, C. L.), 430

Electron micrographs of haemocyanins of *Sepia officinalis*, *Octopus vulgaris* and *Cancer pagurus*, 8
— — from *Helix pomatia*, 1
Electron microscopy of bacteriophage ϕX174 DNA, 173

Elliott, A., Bradbury, E. M. & Zubay, G., *Appendix*: Optical rotatory dispersion studies of solid films and solutions of histone, 61
Enzymic studies of the reaction of denatured DNA with formaldehyde, 31
Escherichia coli, a minimum estimate by autoradiography for the length of the DNA, 407
— infected with bacteriophage T4, RNA metabolism, 376
— ribosomes, amino acid composition, 395

Feather keratin, optical rotatory dispersion studies, 316
Fermi, G. & Stent, G. S., Protein synthesis and the onset of intracellular bacteriophage growth. III. Replication of the genome of a secondary phage, 179
Ferrihaemoglobin, helix content, 421
Ferrimyoglobin, helix content, 421
Fincham, J. R. S., Genetically determined multiple forms of glutamic dehydrogenase in *Neurospora crassa*, 257
Flagella from *Salmonella typhimurium*, structural components, 227
Formaldehyde, reaction with denatured DNA, 31
— stabilization of polynucleotide chains from bacteriophage DNA, 309
Fractionation of nucleic acids with the methylated albumin column, 161
Fraenkel-Conrat, H. (see Tsugita, A.), 73
Fronticelli, C. (see Antonini, E.), 368

γ_2 subunits (see haemoglobin), 329
Geiduschek, E. P., On the factors controlling the reversibility of DNA denaturation, 467
Genetic transfer of phage chromosome fragments, 275
Glauert, A. M. (see Kerridge, D.), 227
Glutamic dehydrogenase in *Neurospora crassa*, 257
Goldstein, A., Chain growth of proteins: some consequences for the coding problem, 121
Gratzer, W. B. (see Huehns, E. R.), 329
Greer, S. & Zamenhof, S., Studies on depurination of DNA by heat, 123
Grossman, L. (see Stollar, D.), 31
Gruber, M. (see van Bruggen, E. F. J.), 1, 8
Guild, W. R. (see Morowitz, H. J.), 93
Guthrie, S. (see Sinsheimer, R. L.), 142

Haemocyanins, structure and properties, 1, 8
Haemoglobin, the recombination between human and canine, 323
— dissociation and recombination of subunits of human, horse and canine, 368
— helix content, 421
— some properties of the α_2 and γ_2 subunits of foetal type, 329
Hall, C. E. (see Maclean, E. C.), 173
Harrison, P. M. & Hofmann, T., The structure of apoferritin: evidence for chemical subunits from "fingerprints" of tryptic digests, 239
— — & Mainwaring, W. I. P., The structure of apoferritin: amino acid composition and end-groups, 251
Haselkorn, R., Studies on infectious RNA from turnip yellow mosaic virus, 357
Hearst, J. E., The specific volume of various cationic forms of deoxyribonucleic acid, 415
Helical and linear aggregations of macromolecules, a theory, 10
— polynucleotide stability due to base contributions, 500
— polynucleotides, hypochromism, 518
α-Helix, the effect of deuteration on structure, 83
Helix content of solutions of native and acid-denatured ferrihaemoglobin and ferrimyoglobin, 421
Helix pomatia, electron micrographs of extracted haemocyanins at different pH values, 1
Hershey, A. D. (see Burgi, E.), 313
Histone, an X-ray diffraction study in isolation and in combination with DNA, 444
— optical rotatory dispersion studies, 61
— polarized infrared studies, 50

Hofmann, T. (see Harrison P. M.), 239, 251
Horne, R. W. (see Kerridge, D.), 227
